SERVING THE SHIPPING INDUSTRY WORLDWIDE

# Marine Training and Reference Software

The Navigator's Assistant is an excellent yet easy to use software package especially for: Officers of the Watch, Coastal Skippers, Ocean Yachtmasters and those involved in onboard navigation includes:

- Local & World-Wide Tidal Software
- Passage Planning
- Astronomical Navigation

The Navigator's Assistant is an incredibly efficient and timesaving application that makes navigation trouble-free and straightforward.

£149 Euro/US\$229\*

The essential software package to aid even the most experienced officer, including; Tanker port information, cargo estimation software, petroleum measurement tables, material safety data sheets, stability formulae, the electronic version of the International Safety Guide for Oil Tankers and Terminals (ISGOTT), and a petroleum cargo reference section.

This is an Assistant that no Chief Mate can afford to be without, and a great reference aid for junior tanker officers.

£149 Euro/US\$229\*

**Ship to Ship Transfer 'NEW'**

A program to assist the Master/Chief Officer of a storage or lightening vessel, which is discharging to different vessels covering the ships papers:

Statement of Facts; Bill of Lading, Cargo Manifest; Certificates of Quality/Quantity and Origin and Receipt of Documents. Designed primarily for LPG cargoes, this user-friendly software may also be utilised for other liquid cargoes.

£79 Euro/US\$ 125\*

Whether you need to study, revalidate to STCW'95, require a useful guide or simply need to refresh your knowledge, Seamanship Examiner provides an excellent program for Deck Officers on all levels. This user-friendly multi-media program is currently used in over 55 countries worldwide assisting many to pass exams and update their knowledge.

Realistic on-screen examinations can be taken for:

- Master Mariner (Class 1)
- Chief Mates (Class 2)
- QOW(Class4)

Can't afford to fail your exams? Then you can't afford to be without Seamanship Examiner, recent research showed that 95% of users passed their oral exams first time.

£110 Euro/US\$175\*

This title is aimed at students studying for professional merchant navy deck officer certificates of competency and is the essential tool for STCW 95 OOW examinations.

All aspects of ship stability for deck officers up to OOW level are included in this incredibly efficient and user friendly program. The program covers basic principles to practical onboard calculations. Provided in addition to the CD-ROM is a Ship Stability Book complete with hydrostatic data and tank sounding tables, in order to assist with practical ship loading problems.

£55 Euro/US\$85\*

Following on from the successful Stability OOW software is this new title for the Mates/Masters syllabus.

This software will recap on key elements from the OOW syllabus and then build on that learning in a structured modular format to raise the competence level to that required for the Chief Officers or Masters level onboard.

Split over 29 sections, with full colour graphics, self-assessment questions, on-screen tutorials and a series of questions at the end of each section.

This is an essential package when studying for your senior certificates at college and a great personal reference aid when onboard ship.

£79 Euro/US\$725\*

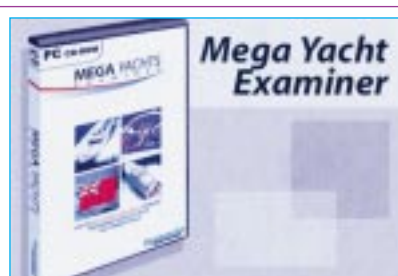

The Signals Tutor assists with the preparation for the signals exam. This timesaving program is highly user-friendly and realistic, ensuring learning is easier and more focussed, without the need for a study partner.

This program coaches and tests your knowledge on:

- International Code Flags
- Beginners Morse
- Advanced Morse

You can adjust this program to suit your own pace of learning, allowing you to increase the Morse words per minute to ensure that your ability exceeds exam requirements. Also included is an extremely realistic on-screen examination that makes Signals Tutor a great value learning tool.

£25 Euro/US\$40\*

By the 31 st July 2003 all captains and watch officers of commercial motor and sailing yachts MUST have completed the STCW 95 commercial endorsement to their current certificate. If you are preparing for the Class 4(Y) or 5(Y) MCA oral examination for Master or OOW this new training CD-ROM will coach and test you with over one thousand questions in the relevant subject areas that make up this exam. You can also sharpen your knowledge on a particular subject area by focusing on any of the sixteen subject areas from buoyage to business & law, which can be marked as you learn in order to monitor your progress. These individual subject areas can then be collaborated to create unique random exams on-screen. Additionally there is a step-by-step tutorial section and over 500 pages of reference for your use, containing titles such as 'The Mega Yacht Code' to benefit you in your studies and your work onboard.

£729 Euro/US\$ 199\*

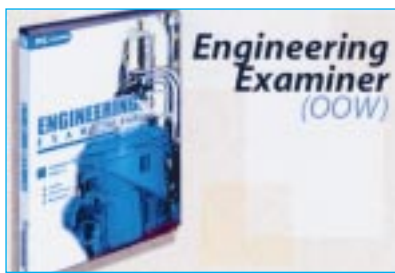

The fun and easy to use Rules of the Road at Sea is a computer based tutorial and refresher CD-ROM that uses excellent animated graphics, colours and sounds that bring realistic sailing scenarios to life. The software is suitable for:

- Day & Coastal skippers
- Yachtsmen
- Boat Users
- Anyone learning the collision regulations

The CD-ROM is accompanied by 'The Skipper's Pocketbook' and 'Morgan's Seaman's Guide Pocket Book' to produce the ultimate learning aid for the collision regulations, at an extremely affordable price.

£39.99 Euro/US \$ 60\*

## Engineering Examiner (OOW)

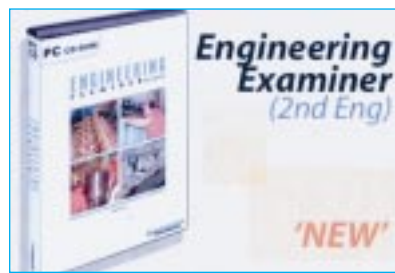

For Cadets preparing for OOW engineering orals, Electricians with STCW'95 certification who want to take an engineering watch-keeping certificate, and Motormen progressing to 4th watch-keeping engineer.

The Engineering Examiner creates mock exams to test your knowledge and in addition you can also study from the large pool of questions covering:

- General Engineering Knowledge
- Safety
- Electrical

This highly user-friendly program uses clear graphics, excellent photographs and useful engineering drawings to bring the whole program to life and ensure that the learning experience is enjoyable.

£55 Euro/US\$85\*

## Engineering Examiner (2nd Eng)

'NEW'

The class 2 engineering examiner is designed as a study aid for engineering officers that are taking or planning to take their class 2 STCW 95 motor certificate of competency - part B EK. This CD covers questions in general engineering knowledge, motor and class 2 orals, with a built in mock oral examination.

This package will also prove to be an extremely useful revision tool for second engineers who are planning to take their Chief Engineers STCW 95 certificate.

£79 Euro/US\$ 125\*

## Engineering Knowledge

'NEW'

This comprehensive electronic engineering encyclopaedia contains 800 pages of marine engineering reference, making it one of the most complete products on the market. The contents are easily accessed and rapidly searchable on screen using the inbuilt search engine. An invaluable aid when studying towards an engineering certificate of competency, or as a handy reference onboard for cadets to Chief Engineers, or simply for anyone with an interest in the ships machinery plant and the components thereof.

The 'Engineering Knowledge' software is split in to 18 sections covering design, theory and the technical/operational aspects of the subjects, with great importance being put on safety at sea, safety of the seafarer and the environment throughout.

With over 400 graphics and 1,500 questions and answers on marine engineering makes this the reference aid to have at your fingertips.

£49 Euro/US\$75\*
